

Dear Steve and Handcrafted Cabinet Company;

Thank you for your professional manner and the knowledge you shared with us in providing such a beautiful solution to a very perplexing problem. We are so pleased that we wanted to record our experience so you could share it with those who may be considering the services of Handcrafted Cabinet and Furniture company.

We put an addition of two rooms onto our home and thought it wise to have one of the rooms include a guest bathroom. This proved to be much more expensive and complicated than we had ever imagined. Among the many problems that arose, one of our biggest was the placement of the water heater. We had hoped to install a small wall unit but learned our power limitations could not handle the draw this would require. We did not want to place the water heater outside which left us only one option, to place the water heater in the room. Since this room's primary purpose was to be an office doubling as a guest bedroom we were distraught to think that we would have to decorate around a water heater!

You came to our home and assessed the problem and showed us how you could build a cabinet around the water heater adding more cabinets along side the water heater to give us not only a beautiful look but much needed storage.

The water heater was installed and was a real eye sore in the new office until you came with your beautiful cabinets. You would never know there was a very large water heater hiding inside the beautiful cabinetry you installed and we are thrilled with the extra storage space we have with the cabinets that were installed along side the water heater cabinets.

We also had you install a vanity in the bathroom so all the wood in the office and bathroom would match. It too is beautiful and our surprise came when we opened the drawers and discovered what nice cabinetry it is. The drawers glide effortlessly and the quality is evident.

Not only was your talent and craftsmanship greatly appreciated but you were very enjoyable to work with and we would recommend you

and your company to any of our friends....and in fact, we already have.

Brad and Sharon
