Handcrafted Cabinets
Via e-mail

Re: Letter of Reference

To Whom It May Concern::

Please consider this letter as a great referral for using Handcrafted Cabinets on your projects. We are happy customers.

For the last nine years, we have worked with Handcrafted Cabinets on a variety of projects. These projects have been big and small, and the homes their products have gone into are all high end custom homes, ranging up to \$9 million. The cabinetry and furniture has been specific for each home, and we have used a variety of styles and finishes.

We particularly have appreciated the high level of customer service, as well as the value provided through matching budgets with cabinetry. From the original quotation, through the selection process, the pricing and finalization of an order, installation and warranty, the team at Handcrafted has been great for Platinum Homes and its customers.

Some of the work has been highlighted in **Phoenix Home and Garden Magazine** in two or three homes that have appeared there that we have built. Whether manufactured or custom cabinets, the work has turned out very nicely.

Please feel free to have anyone call either myself or Lisa Tate here for any clarifications.

Thanks for the great work!

Dave Reese
